

# Lithium Polymer (LiPO)

Lithium polymer cells have high energy density, a lightweight design and a wide range of shapes and sizes. These battery cells are used in various portable electrical devices and applications due to their performance characteristics and versatility.

Model	Rated capacity (mAh)	Voltage (V)	Thickness (mm)	Width (mm)	Length (mm)
4562100	3500	3.8V	4.5	62	100
391419	65	3.7V	3.9	14	19
345268	1800	3.8V	3.4	52	68
661515	85	3.7V	6.6	15	15
621756	580	3.7V	6.2	17	56
451885	730	3.7V	4.5	18	85
402020	100	3.7V	4.0	20	20
902030	480	3.7v	9.0	20	30
405993	2750	3.7v	4.0	59	93
806080	4900	3.7V	8.0	60	87
6085100	6000	3.7V	6.0	85	100
644755	2100	3.8V	6.4	47	55
701245	300	3.7V	7.0	12	45
301419	40	3.7V	3.0	14	17
104266	3200	3.7V	2.0	42	65
804388	3480	3.7V	8.0	43	88
902745	1100	3.7V	9.0	27	45
803045	1100	3.7V	8.0	30	45
