

FRONT-OF-METER REVENUE GENERATION

Sparq Capitalizer

Your battery isn't just a cost-saver — it's a revenue engine.

Skällinge/Gothenburg

WHAT IT IS

Sparq Capitalizer is an energy storage system built to actively generate revenue from European energy markets through Front-Of-The-Meter (FTM) services. By participating in frequency regulation (FCR, aFRR), capacity markets, and energy arbitrage, your battery works for you around the clock — turning a capital asset into a consistent income stream.

WHO IS IT FOR?

Investors, financial institutions (SPVs), energy companies, and large industrial players looking to monetise battery assets through European grid services and wholesale energy markets.

- ✓ "We have a large capital investment sitting idle outside peak hours."
- ✓ "Energy market revenues are attractive but technically complex to access."
- ✓ "We need a system that actively manages market participation — not just stores energy."

Sparq Capitalizer

WHAT YOU GAIN

Generate revenue 24/7

Earn from frequency regulation markets even when your facility is idle or off-peak.

Diversify revenue streams

Combine FCR, arbitrage, and BTM services for maximum return on your battery investment.

Hands-free market access

Sparq EMS handles market optimisation automatically — no energy trading expertise required.

KEY COMPONENTS

- LFP battery storage from 500 kW and 500 kWh
- High-performance BESS (500 kWh – 1 MWh)
- Sparq EMS with market-integration algorithms
- Frequency Regulation (FCR / aFRR) capability
- Arbitrage and capacity market participation
- Fleet management for multi-site portfolios

CUSTOMER STORY

"Our battery asset generates consistent revenue month after month. Sparq handled the entire market integration — we just collect the returns."

— Investment Director, Energy SPV
(Netherlands)

BUILT ON TRUST

Made in EU

Hardware & software developed in Europe, with local support

Fully Certified

ISO 9001, ISO 14001 & ISO 45001 — plus EN54 & CE compliance

40+ Years Experience

Leading European battery provider with decades of expertise from the battery industry

Fully Customizable

Configuration will be tailored to each customer's needs
